 Harpenden, Hertfordshire
(Willing to commute)

ABOUT ME

I'm a UX/UI designer with experience designing data driven software used in live sports environments. I enjoy turning technical systems into clear easy to use interfaces. I've worked in technical environments alongside developers to create high quality designs that are consistent and user focussed. I like solving problems and making digital tools easier to use.

RELEVANT EXPERIENCE

Placement UI/UX Designer • Basingstoke
Hawk-Eye Innovations • July 2024 - July 2025

- Designed high-fidelity UI solutions for complex, data-driven sports analysis software. I translated technical requirements into wireframes, prototypes, and components. I collaborated closely with developers and product managers, contributed to design systems for consistency, and used usability testing to refine workflows while simplifying complex data into clear, efficient user experiences.

UI/UX Student Client Project • Reading
Volta Management • Sep 2025 - Jan 2026

- Worked in a team on a live university client project for Volta Management, a grassroots football organisation, designing a digital solution based on user needs and client goals. I contributed to research, ideation, wire-framing, and final UI design, while developing strong communication, teamwork, and problem-solving skills through client collaboration and feedback.

EDUCATION

University of Portsmouth
BSC User Experience Design • 2022 - 2026

Roundwood Park School - Harpenden
Secondary School & Sixth Form • 2015 - 2022

GCSE's (2020)	A-Levels (2022)
9 GCSE's Grades (9-5) - Distinction in Creative I-Media and grade 9 in Product Design	- Product Design (A) - Psychology (B) - Biology (D) - Core Maths Level 3 (C)

SKILLS AND EXPERTISE

- UI Design**
- High-fidelity interface design
 - Component libraries & design systems
 - Visual hierarchy, spacing, grids & layout systems
 - Icon and UI graphic design

- UX & Research**
- User interviews & usability testing
 - Persona creation & journey mapping
 - User flows & task flows
 - Accessibility & inclusive design

- Collaboration & Delivery**
- Working within Agile product teams
 - Developer handoff & design documentation
 - Communicating technical design decisions

- Tools and Software**
- Figma (Components, auto layout, prototyping)
 - Miro
 - FigJam
 - Adobe Creative Suite
 - Basic HTML & CSS

- Soft Skills**
- Problem solving and critical thinking
 - TeamWork and collaboration
 - Attention to detail
 - Adaptability
 - Time Management

HOBBIES & INTERESTS

Football, Golf, Cricket, Cooking, Travelling, Gaming, Sport data & analytics
